

Barry S. Callahan, M.D.

ANDREWS

ORTHOPAEDIC & SPORTS MEDICINE CENTER

Hand Surgery and Reconstructive Microsurgery

Hand, Wrist and Elbow surgery requires unique skills and training that are in short supply in the Northwest Florida and South Alabama market. The opportunity to impact the quality of life for this entire region is a noble and worthy calling.

Dr. Barry S. Callahan is an orthopaedic surgeon with specialty training and focus on the Hand, Wrist and Elbow. The treatment of these complex and vital joints requires the skills of a specialist who is even capable of musculoskeletal tissue transplantation such as performed in reconstructive microsurgery.

Dr. Callahan, a native of Bristol, Tennessee, earned a Bachelor of Science with honors from King College in Bristol. This Presidential Scholarship honoree pursued his goal of a lifetime of medical service by entering the University of Tennessee College of Medicine in 1986.

After receiving his Doctor of Medicine in 1990, Dr. Callahan proceeded to the prestigious

Indiana University School of Medicine and the Indiana University Medical Center to complete his internship and residency. He completed his Hand and Microsurgery fellowship with internationally renowned James W. Strickland, MD at The Indiana Hand Center in 1996.

As a contributing editor of the Indiana Hand Center Newsletter, Dr. Callahan has been honored with memberships in the most internationally respected Hand professional organizations in the world, such as the American Society for Surgery of the Hand, the American Academy of Orthopaedic Surgeons, and the American Medical Association.

In addition to the memberships and training that contribute to the quality patient outcomes over his career, Dr. Callahan has been invited to make presentations and create publications that have been used as a standard of care both nationally and regionally.

Dr. Callahan desired to relocate his practice and family to the Pensacola area to not only fill the void for Hand Surgery in the area, but also take advantage of the Andrews Institute Research facilities and develop a post-graduate Hand Surgery fellowship program. The Andrews Orthopaedic and Sports Medicine Center located at the Andrews Institute in Gulf Breeze is proud to add another diamond into the setting for this very special center.
