# Precalculus A Graphing Approach

**thomas tradler holly carley - websupport1** - preface these are notes for a course in precalculus, as it is taught at new york city college of technology - cuny (where it is offered under the course number **math book of problems series - pearson** - math book of problems series new from pearson custom publishing! the math book of problems series is a database of math problems for the following courses: **chapter 1: functions - kkuniyuk** - (section 1.1: functions) 1.1.4 tip 1: think of a function button on a basic calculator such as the  $x^2$  or button, which represent squaring and square root functions, respectively. if a function is applied to the input 5, the calculator can never imply, "the outputs are 1 and ." example 4 (ages of people) for a relation  $r$ , • the set of inputs is the set of all living people. **before you take an accuplacer mathematics placement test!!!!** - before sitting down to take the test... realize that no food or drinks are allowed in the testing center, so eat well before testing and/or take snacks to eat between the tests if you are testing over multiple subject areas. do request scratch paper. use it to eliminate answer choices on the scratch paper.
